

M.C.C Limited has been involved in the cleaning of children's ball pools since 1998 and has witnessed all kinds of health concerns which could have been avoided if regular cleaning had taken place. With the right equipment, cleaning your ballpool is easy and should be carried out regularly as part of a scheduled maintenance clean.

## What's hiding in your Ballpool?

**10 germs, diseases & foreign objects which have been found in Ballpool's:**

Campylobacter

Streptococci

E-Coli

Salmonella

Human excrement

Vomit

Variety of foodstuff

Soiled nappies

Scissors/Sharp objects

Dead mice & rats

**Surprised!?! These are just examples of the visible & invisible material any ballpool is capable of hiding!**

Your play facility is your livelihood, do not gamble on your next inspection or wait until your next customer complaint, clean up now and maximise your investment before it's too late.

**How can we help? Here are 3 solutions we offer to combat these problems:**

1. We offer for sale a unique ball washing system which can extract, wash & bag your play balls at the incredible rate of 15,000 per hour.
2. If owning your own machine isn't for you, then why not consider our ballpool cleaning service? Utilising our machine and trained cleaning staff, we will come and clean your balls for you.
3. If your play facility is in need of more than just its balls washed then we also offer a play area deep clean whereby our team come and clean your play structure as well as the ballpool. (A certificate of cleanliness is provided for you to display with options 2 & 3) Contact us now for full details on **0161 480 2832**.

## Ballpool Cleaning Service

### Our approach

The cleaning process is performed by two men, using our own ball cleaning machine. The process involves submerging each ball into a chlorine based sanitisation fluid in order to kill any surface bacteria. The balls are then pumped into nett sacks which allow the balls to be stored safely whilst the cleaning of the pit takes place. Broken balls are removed and the pit is wiped down and vacuumed, after which the balls are emptied back into the pit and left to dry.

### How much does it cost?

Example prices are based on cleans within a 50 mile radius of Stockport: (Additional travel costs are shown below)

# of balls	Cost	# of balls	Cost
20,000	£250.00	60,000	£425.00
30,000	£275.00	70,000	£475.00
40,000	£325.00	80,000	£525.00
50,000	£375.00	90,000	£575.00

#### Additional travel charges to the table:

Up to 100 miles will be charge at £50

Up to 150 miles will be charged at £75

Over 150 miles will be charged at £100.

## Ballpool Deep Cleaning Service

### What is a “Deep Clean”

A deep clean is a planned regular event that should be part of your cleaning and maintenance schedule. This type of clean should take place at least quarterly and should include every area within your facility. A deep cleans’ objective is to remove as much ground in dirt as possible and remove dust from area’s that are not included in your daily or weekly cleans i.e. Dust removal from netting framework, shampoo all carpeted area’s, steam off the washroom facilities, clean the ballpool etc..

### Our approach

We allocate a maximum of 6 hours onsite, during which our main concern for is to tackle the play frame and ballpool. Any additional work as identified below can be quoted & completed normally within the same visit at an additional cost to be agreed with the operator.

All deep clean prices include 4 men on site and is charged at £50 per hour with a minimum charge of £600 for all sites within 50 miles of Stockport, with additional travel charges for areas over 50 miles as detailed above.

**Emergency cleans can be arranged at short notice but pleased note that time on site before 8am or after 6pm, will be charged at x 1.5 the rates shown above. (Applies to both services)**

## Ballpool Cleaning Equipment

The Ballpool sanitisation system is a powerful, effective and mobile solution to problems involved in ballpool cleaning, suitable for any size of play area, large or small.

The BP 240 is a unique machine which has been purpose built to address the problems involved in cleaning children’s ball pool’s and has been developed into the simple, easy to use unit it is today.
